

Water Activities

Swimming

Swimming can be enjoyed at the jungles edge in two different locations on the farm. You can swim in the lower hydro lake next to the main dam which is below the resort as well as in Freshwater Creek. In the creek itself there are two swimming holes in between the rock formations that are along the creeks edge. One of the swimming holes is at least 30 feet deep! Freshwater Creek runs alongside the river park that has beautiful meadows with cattle and sheep grazing during the day. Life Vests provided.

Inner Tubing

Enjoy a lazy ride on an inner tube in Freshwater Creek which winds thru the jungle with lush vegetation while listening to the chirping of birds. Depending on the water levels at different times of the year the creek will be faster or slower moving. You can start the inner tube trip at many different locations along the creek and will end up in the River Park or in the swimming holes alongside the River Park. Life vests and inner tubes provided.

Canoeing

The hydro lake below the resort provides an excellent quiet setting for you and another person to canoe around the edge of the jungle to watch for wildlife and enjoy the sounds of the birds on a quiet day. Life vests provided.
