

Hiking Activities on the farm

All hikes will have two hiking guides that will guide you through the hike. One of the guides will be a certified tourist guide, the other guide is from Fresh Water Creek Farms which is affiliated with Maya Heights Village Resort who is familiar with the trails and the farm and will be able to answer all your questions.

Hike Options

Vista Hike – 1 ½ hour

This hike is the easiest hike and will take about one to 1/1/2 hour. The hike will begin at the restaurant and return by jeep to the restaurant after the hike is completed. This Hike will take you through some of the teak forest, up through the mountain tops through some valleys and eventually end up below the restaurant. Beautiful vistas and easy walking. Anti-bug spray recommended and sensible shoes.

Jungle Hike – 2-hour

This hike will take you off the farm and deep into the adjacent National Forest land. A two-hour hike below the restaurant, passing the teak forest and then entering the National Forest where we you will follow the logging trails. Possible wildlife to be encountered, Monkeys, Wild Boars, Coati, Birds of all kinds and Ant trails. The trails that you will be hiking on are overgrown bulldozer trails and require good walking/hiking abilities. Anti-bug spray recommended as well as long pants/long sleeves and good walking shoes. Our two tour guides will lead and follow the excursion, one will be at the head of the group and will give explanations and guide the tour while another guide will bring up the rear of the hiking group for safety measures and will be able to answer questions.

Option: River Trail / Howling Monkey Trail: Check with the front reception desk if tour is available. Jeep or truck will be used to starting point of the hike.

Extreme Hike – 2 to 4-hour

There are different options for this hike. One of the options for this hike will be to start at the bottom of a canyon at the end of a creek bed. The challenge of this hike will be to follow the creek upwards to the crescent of where it comes from. Most of this creek is dry and the creek beds looks like something out of a dinosaur movie.

The second version of this hike is to first find the source of another creek descending from the crescent to the bottom. At the beginning of the hike, you will start in a very deep canyon, continue hiking further into the canyon and end up at a hydro lake where the creek flows into.

Both hikes require climbing or descending where no trails are, machetes are needed. These hikes are for experienced hikers only. Hikers will be rewarded by jungle terrain that they have never seen before. Long pants and sleeves are recommended along with anti-bug spray. Hiking shoes required. Two experienced guides will be with you.
